TUESDAY

LITTLE POPSICLES

Group 1-3

Little Popsicles was inspired by the love of education and passion for children. It was established with the aim of providing a fun learning experience for children. Each week the club begins with a short story with the aim to inspire the baking and crafting activity that follows. Baking and crafting activities are rotated on a weekly basis.

All the resources are provided for by Little Popsicles. If your child is unable to attend a class their baking/crafting pack will be given to their class teacher for them to complete the activity at home. Your child will proudly bring home their little masterpieces and most likely want you to taste their delicious creation. At Little Popsicles, we strive to provide your child with a nurturing, creative environment as well as provide the children with a natural and healthy popsicle that is given out at the start of each lesson.

During the class, our aim is to enhance a number of skills that will assist in your child's development. During baking children learn how to follow direction and use thinking skills to solve problems. Mathematics is practised while measuring ingredients and bilateral hand-eye co-ordination is improved. Crafting develops fine motor skills, boosts self-esteem, encourages self-expression and promotes innovation and creativity. Children learn patience waiting for the end product and practise planning skills when they plan what they are going to make. The children also practise writing skills and while pressing and pushing dough, improve muscle development in fingers to help hold pencils. The children learn kitchen safety and the importance of tidying up once they have finished with their play.
