

Activity program block 3 EN

Dear parent(s) and caregiver(s) of UniKidz,

We are proud to share our activity program for this term! We have put together a great mix of our well-known labels: FitKidz, SkillsKidz, SoulKidz and MindKidz. This activity program will start on April 7 and end on July 4, 2025.

Please note: the week prior to this activity program there will be an orientation week. During this week, the children can find out which activities they like to do during the upcoming block. During the orientation week, we will take care of the registrations together with the children, so they will be registered for their favorite activity.

And don't forget, during the last week of this program (June 30 till July 4) there will be viewing classes, so please mark these dates in your calendar!

Thank you in advance and we look forward to having a great time with the children!

Sincerely,

Team UniKidz Floriande

15.30 - 18.30 o'clock

Don't feel like an activity for a while? And do you like to play freely? Of course this is also possible at UniKidz. Playing with lego, playing games, reading a book, being creative and many other relaxing activities.

4-12

KICKBOXING

16.00 - 17.00 o'clock

Kickboxing is in the US originated as a system to allow fighters from different martial arts styles to compete against each other. In kickboxing, the punches from boxing are combined with the kicks from sports like karate and taekwondo. Kickboxing is a mix of strength, endurance, and technique. Are you ready to improve your skills?

6-12

COSPACES

16.00 - 17.00 o'clock

We're going to explore the digital world, and we'll do that with Cospaces. Here, we can build and program our own world. Have you always wanted to create your own game? Now you can build your own environment or game!! Last week we are connecting with VR glasses and walk in your own space.

GENERAL ACTIVITIES

15.30 - 18.30 o'clock

Don't feel like an activity for a while? And do you like to play freely? Of course this is also possible at UniKidz. Playing with lego, playing games, reading a book, being creative and many other relaxing activities.

6-12

SKATING

16.00 - 17.30 o'clock

In this skateboarding lesson, you'll learn the basics of skateboarding, from balancing to making your first movements. You'll practice different tricks, such as turning, stopping, and small jumps. The lesson is suitable for both beginners and more advanced skaters, allowing you to improve your technique step by step. By the end of the lesson, you'll feel more confident on your skateboard and be ready for new challenges!

*This activity will be conducted by an external party.

4-12

ROBOTICS

16.00 - 17.00 o'clock

In the activity "Robots on wheels" children learn how to build a robot that can move. They discover the basic principles of technology and programming in a playful way. By setting up and controlling the robots, they develop problem-solving and creative skills. It is a fun and educational experience for young techies!
